Thoughtfully Planned

Bridgeland was specially designed to keep nature in the balance.

Bridgeland is a sustainable master planned community with a mission to preserve, restore and enhance its natural surroundings while providing residents with everything they need to live well-balanced lives.

GUIDING PRINCIPLES

Bridge Connect the gap between nature and development by joining homes, amenities and retail space with native vegetation, thriving wildlife and abundant waterways.

Thrive Provide residents with community outlets for education, worship, social and cultural activities, employment, shopping and recreation.

Balance Offer a harmonic balance between nature, homes and mixed-use retail space through preserving and dedicating 3,000 of the development's 11,400 acres to lakes, trails and parks.

Preserve Consider sustainability and remain environmentally conscious in approaches to irrigation and the community's ecosystem.

Restore Return natural beauty to land that was utilized for rice farming decades ago by implementing meadow-like plantings and creating new habitats for wildlife.

Paddle your kayak across 140-acre Josey Lake.

Enjoy up-close views of wildlife from the birding tower.

Connect with nature as you stroll along tree-lined paths.
